

# TEDRA Enters an Alliance for ROBOTIC CAR PARKING

**AJAY RAINA, DIRECTOR & CEO  
TEDRA AUTOMOTIVE SOLUTIONS PVT LTD**

**T**edra Automotive Solutions Ltd. a leading Car Parking Solution Provider with manufacturing base in Pune and a sale, service footprint across the country has tied

up with SEMPER M Corporation, Seoul Korea for an exclusive marketing representation in India.

SEMPER is a world class Korean company with presence in more than 12 countries. The company designs and manufactures Robotic Solutions for car Parking.

These systems facilitate driverless parking, do not use pallets (pallet-less solution) which reduces parking height & creates more parking space, retrieval time is also faster as there is no pallet exchange. The system can be adapted to concrete as well as a steel structure, both. System can carry vehicles up to 3 tons of weight (3,000 Kg) (VAN, SUV, SEDAN all with same robot) and can also operate with a mobile app.

Mr. Ajay Raina, CEO of Tedra Automotive informed that this tie up has enriched our bouquet of products being offered to customers in India, being a company that offers the most diverse range of parking products and customized solutions for the parking needs a tie up with SEMPER Korea shall further add to our ability especially for high-end, modern Living aspirational Projects where we can now offer a driverless parking solution with speed, safety, and efficiency to our customers. ■
